ABOUT US

Malazi Kenya Limited is an Engineering, Procurement, and Construction (EPC) contractor, duly incorporated to offer construction services for residential, commercial, industrial, and road projects. Based in Wichita, Kansas, we also have an office in Kenya.

As part of the Acacia Group, a real estate firm headquartered in Kansas, we strive to enhance value for money by providing quality and affordability at all levels. Our team comprises professionals in architecture, civil engineering, building technology, project management, and finance. We prioritize our clients and are committed to superior quality and results, reflected in our motto: *"Committed to Superior Quality and Results."*

MISSION

To deliver superior construction services by leveraging advanced technology, skilled professionals, and a client-centered approach, contributing to Kenya's infrastructural growth and development.

VISION

To be a leading construction company in Kenya, known for our innovation, quality, and sustainable building practices.

OUR VALUES

- **Quality:** Commitment to excellence in every project we undertake.
- **Integrity:** Maintaining transparency and honesty in all our dealings.
- **Innovation:** Continuously improving our methods and embracing new technologies.
- **Sustainability:** Ensuring our projects are environmentally friendly and socially responsible.
- **Client Satisfaction:** Striving to exceed client expectations through exceptional service.

OUR SERVICES

REAL ESTATE CONSTRUCTION

We believe housing is essential and have the capacity to handle complex developments, from single units to multi-storey buildings. With over twenty years of experience in residential and commercial projects, our experts excel in blueprint implementation, including ground leveling, landscaping, structural reinforcement, interiors, and renovations. We specialize in both affordable housing schemes and luxurious developments and have expertise in alternative building technologies like prefab and precast.

ROADS, BRIDGES AND MARINE ENGINEERING WORKS:

With the latest machinery and technology that we have embraced, we can handle Road construction, Bridges, and Highways. Airports and Seaports development.

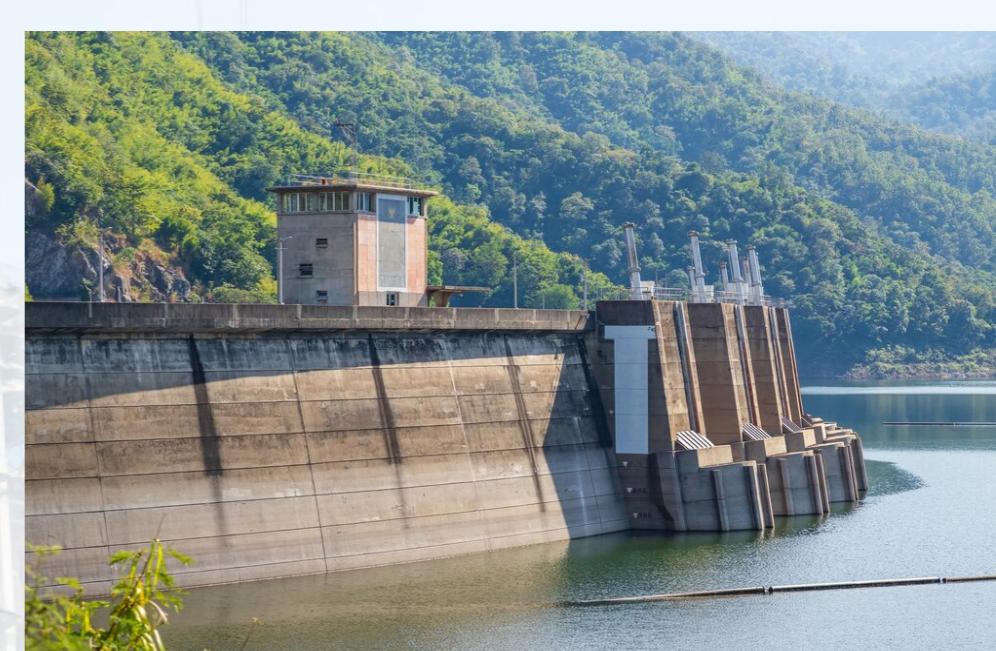

WATER AND SEWERAGE:

Water being a major resource is a key pillar in the construction sector. Our team of professionals has the experience to design and build water resources from borehole drillings, waterproofing, water treatment plants, plumbing works, and sewerage line installations.

DAMS AND IRRIGATION:

We can design and build dams and irrigation sites meant for agricultural, energy supply, and domestic use. We have embraced the fastest technologies from 3D AutoCAD in design to implementation.

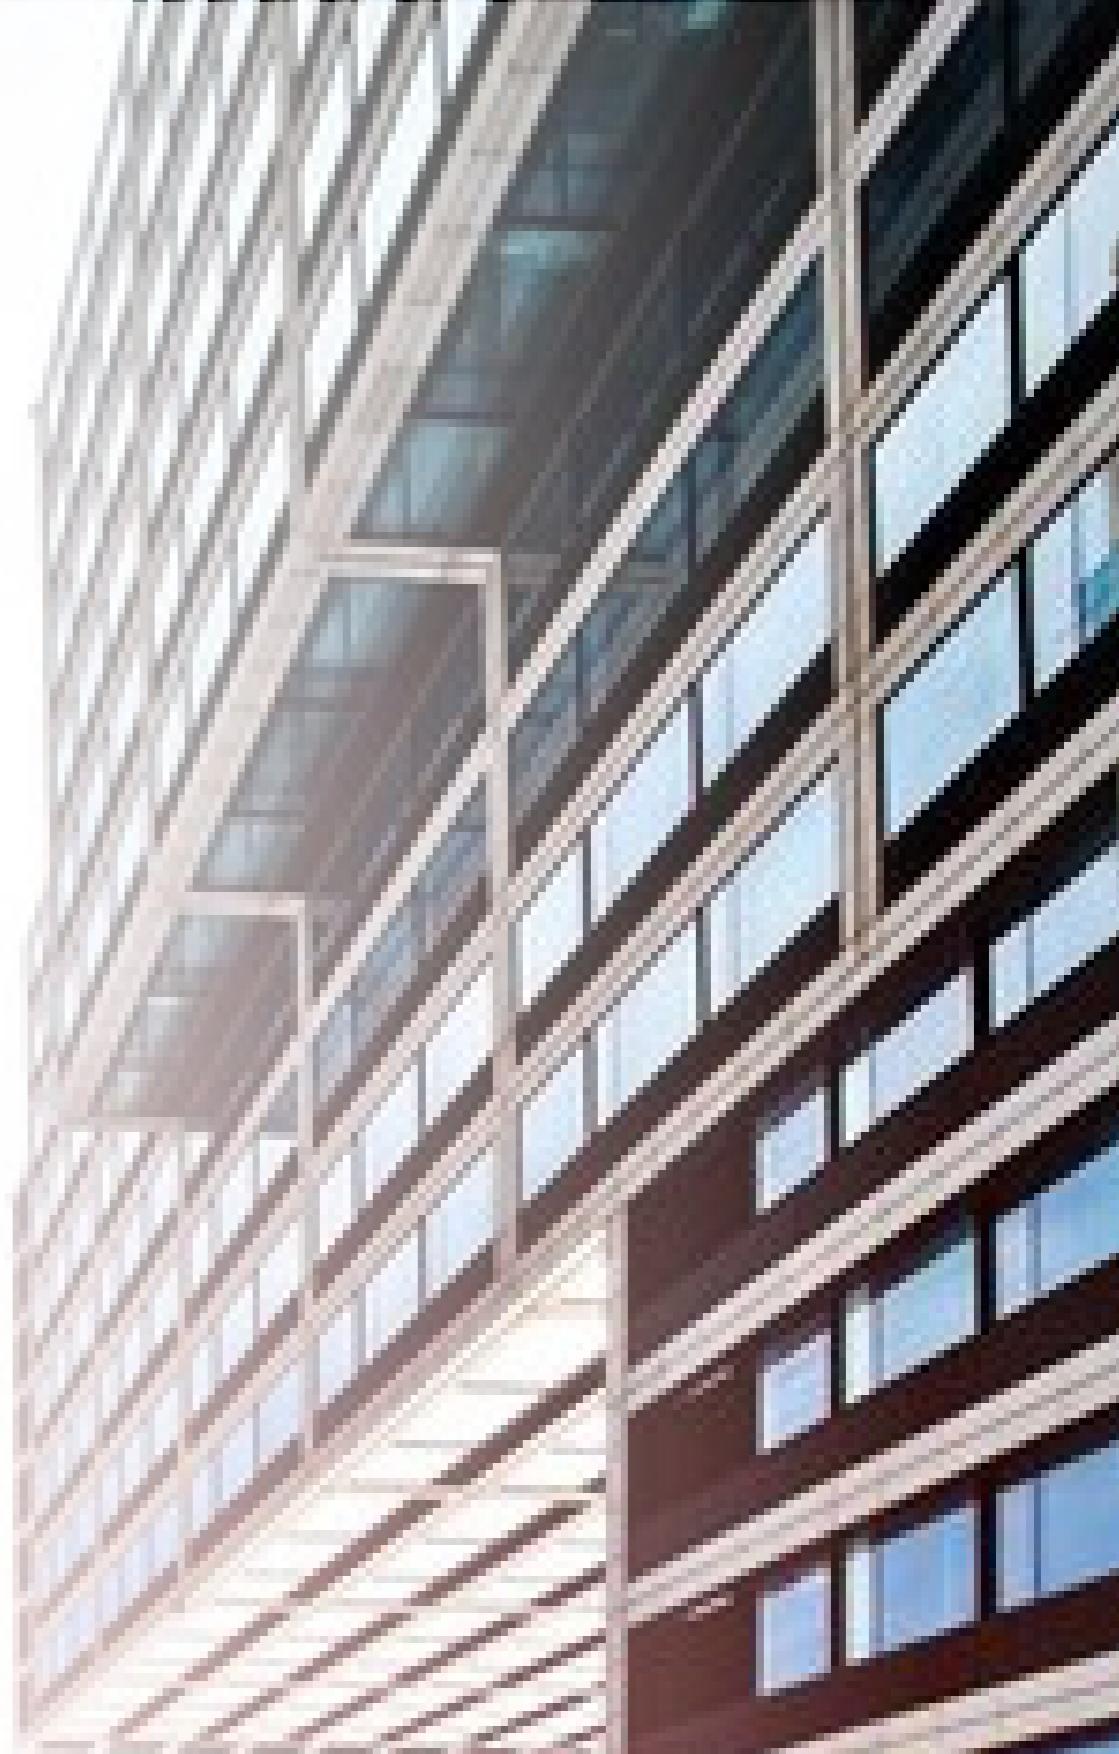

OIL AND GAS WORKS:

Our Electrical and Mechanical Engineering division can design and construct Oil refineries and gas plants. We drill oil reservoirs, and storage tanks installation and build pipelines. We put measures during construction to maximize quality and safety.

RENEWABLE ENERGY:

Africa is a fast-growing Renewable Energy consumer in the world. From wind power, geothermal, and Solar. We can handle works from Renewable Energy Development to EPC via our Renewable Energy divisional ENERGY LTD. We have identified a site to structure and develop a 60 MW of solar power in Isinya - Kajiado county.

COMPLETED PROJECTS

Kathwana Market Ambulation Block:

Enhanced market functionality and hygiene.

Ndagani Modern Market:

Boosted local commerce with a modern marketplace.

Culvert Projects in Kajiado:

Improved road safety and accessibility.
